

Achilles Group Basic Policy on Fire Prevention and Disaster Response

Fire prevention and disaster response represents a core management item for any business enterprise. If a fire or a natural disaster such as an earthquake occurs, the company's situation can be dramatically transformed and even its very existence may be threatened. A fire or natural disaster at a manufacturing facility can also cause serious problems for local residents, which goes against Achilles Group's ethos of developing together with society for mutual benefit. Achilles Group strives to ensure, on a day-to-day basis, that we are properly prepared for an emergency; we take preventive measures in order to safeguard lives and property, working to prevent disasters from occurring and to ensure that, in the event that a disaster does occur, the threat to human life and to property can be kept to a minimum.
