The Company also hereby announce that at the Board of Directors meeting held on May 12, 2026, the Company resolved to distribute dividends of surplus with March 31, 2026, as the record date. This matter will be submitted for approval at the 106th Annual General Meeting of Shareholders, which is scheduled to be held on June 26, 2026.

(3) Reasons for variances

Regarding the non-consolidated financial results, net sales were largely in line with our forecasts.

Operating profit exceeded our previous forecast due to an increase in gross profit on the back of a higher proportion of sales of films for the medical sector and industrial materials, which have a high profit margin, along with further cost-reduction activities achieved through intensive production efforts at manufacturing sites, including the streamlining of raw material and energy costs, company-wide efforts to continuously curb expenses, and on-going initiatives to promote price revisions. Ordinary profit also greatly exceeded our previous forecast, mainly due to the recording of 719 million yen in foreign exchange gains under non-operating income in line with the weakening of the yen.

Profit overall exceeded our previous forecast, despite the recording of 905 million yen in impairment losses and 674 million yen in loss on valuation of shares of the affiliated company, both under extraordinary losses.

Regarding the consolidated financial results, net sales also exceeded our previous forecast thanks to the strong performance of our subsidiaries in the United States in terms of films for the medical sector, in addition to the non-consolidated financial results detailed above.

For the same reasons given above for our non-consolidated financial results, operating profit also exceeded our previous forecast. Ordinary profit greatly exceeded our previous forecast, mainly due to the recording of 693 million yen in foreign exchange gains and 181 million yen in share of profit of entities accounted for using equity method. Profit attributable to owners of parent exceeded our previous forecast overall, despite the recording of 905 million yen in impairment losses under extraordinary losses.

(2) Reasons

The Company's core policy is to maintain stable returns to its shareholders, which it intends to achieve through the strengthening of its management foundations, centered on stable management and improving profitability. As part of the Mid-Term Management Plan -FY25–FY27- announced in May 2025, the Company is working consciously toward a dividend payout ratio of at least 30% and a dividend per share of 50 yen, in particular, which are both targets based on recent performance.

Taking into account business performance in accordance with the aforementioned policy, the Company has decided upward its fiscal year-end dividend for the fiscal year ended March 31, 2026, from the previous forecast of 30 yen per share, resulting in a total dividend forecast of 40 yen per share, an increase of 10 yen per share. As a result of this revision, the dividend payout ratio for the full fiscal year ended March 31, 2026, shall be 25.8%.
